Gain an edge in productivity

If you're a busy professional, you're looking for ways to get more done in less time. GN Netcom's™ hands-free communications solutions allow you to talk on the phone while you perform a number of other tasks at your computer or desk.

The sleek, attractive design of our amplified headset and headset telephone provides comfortable, all-day use. These affordable hands-free communications tools are easy to use and give you an edge in productivity.

A history of innovation in hands-free communications

JABRA Corporation, our sister company, has long been recognized as an innovator in mobile phone products, while GN Netcom has a legacy of technical superiority in designing call center products. Now, at GN Netcom, we are applying our innovative thinking to general office communications products. Our new GN 4150 amplified headset and GN 4170 headset telephone were designed from the ground up specifically for busy, multi-tasking office professionals. The pioneering spirit and sound-quality excellence of these products are the hallmarks of all our hands-free communications solutions.

-  Over-head
-  On-ear
-  PC-ready

GN 4150 | amplified headset

Hands-free ease for virtually any phone and PC

The GN 4150 provides hands-free ease for virtually any existing telephone.

Customized style

With a choice of headset wearing styles, either an adjustable headband or moldable earwrap, you can select the style that is most comfortable for you. Developed for busy office professionals, the GN 4150 is stylishly designed for easy use.

Reduce desktop clutter

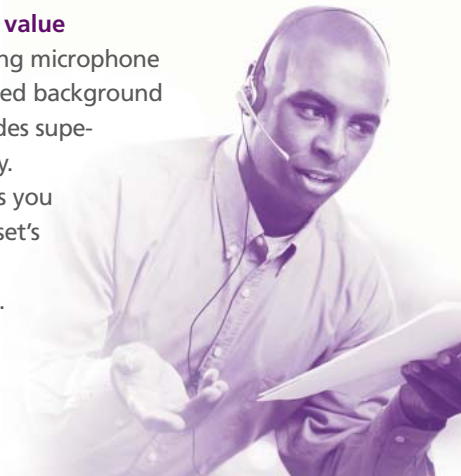

The headset system can be positioned on your desk or mounted on your computer monitor to minimize desktop clutter. And the headset stand, in either position, keeps your headset within quick reach. With a power source of two AA batteries and no extra cords, your desktop is clutter-free.

Extending hands-free use

Enjoy two-way audio across your telephone and/or your computer with the GN 4150's telephone/computer selector. An online indicator also lets others know when you're on the phone. And the versatile 2.5 mm headset connection delivers added value when used with headset-ready cordless and cellular phones.

Built for sound value

The noise-filtering microphone reduces unwanted background noise and provides superior sound clarity. Tone control lets you adjust the headset's tonal quality to your preference.

GN 4170 | headset telephone

Hands-free ease with sleek, space-saving phone.

The GN 4170 replaces existing telephones with a sleek, space-saving phone and headset system.

Customized style

With a choice of headset wearing styles, either an adjustable headband or moldable earwrap, you can select the style that is most comfortable for you. Developed for busy office professionals, the GN 4170 is stylishly designed for easy use.

Reduce desktop clutter

This multi-use phone helps keep your desk free of clutter with its small size and accessible headset stand that keeps your headset within quick reach.

Time-saving conveniences

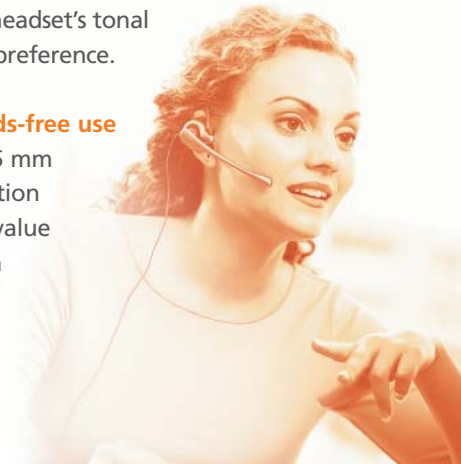

Stay connected with the GN 4170's fax/data port that allows you to transfer data from a fax or computer modem across a single phone line. A redial button and programmable memory features also keep the numbers you need right at your fingertips.

Built for sound value

The noise-filtering microphone reduces unwanted background noise and provides superior sound clarity. Tone control lets you adjust the headset's tonal quality to your preference.
